3.74 GPA

## > SUMMARY

I am a software engineer with 3+ years of professional software development experience.

I am a motivated and diligent worker with a strong sense of ownership and communication skills.

## > WORK EXPERIENCE

### Amazon

Seattle, WA

June 2017 - Present

#### Software Development Engineer I/II

I am an SDE on the Alexa Personality Skills team responsible for delivering customer delighting voice experiences and maintaining multiple high traffic microservices to help bring Alexa's personality to life.

#### Software Development Engineer I

As an engineer on the Seller Enforcement and Restrictions platform team, I was responsible for multiple platform improvement designs to provide a better experience for both our partner teams and for Amazon's sellers.

#### Software Development Engineer Intern

As an intern on the Seller Misconduct team, I implemented a design for a seller enforcement workflow auditing component and a corresponding API used by our internal partner teams.

### Softheon

Stony Brook, NY

June 2016 - May 2017

#### Software Engineer

At Softheon, I worked on creating clean and user friendly front end components of the company's newest product, Welltheos, a private healthcare exchange marketplace.

#### Web Development Intern

As a web development intern, I created four different internal tools to improve the current company work processes using a variety of web technologies, including .NET framework and AngularJS.

### Teen Entrepreneur Boot Camp

New York, NY

February 2014 - May 2016

#### Graphic Design Intern

I was part of the team developing and bringing to market Flip 'N' Check, a dry-erase activity book for children. I was responsible for creating and designing over 40+ puzzles, book covers for the product and two expansion packs, as well as marketing and promotional material.
